Ridgewood High School Students Have "Fun with Physics" Thanks to a Grant From The Valley Hospital and The Ridgewood Education Foundation

March 11, 2013 -- Students at Ridgewood High School recently participated in a new program called Fun with Physics in all Sciences, thanks to a classroom grant funded by The Valley Hospital and The Ridgewood Education Foundation.

Fun with Physics was presented by Dave Maiullo, from the Department of Physics and Astronomy at Rutgers University. The demonstration used smoke, fire, and many other processes and techniques to demonstrate principles of physics in a real-world context.

The Valley Hospital has made a generous donation to the Ridgewood Education Foundation (REF) to support health and science programs in the Ridgewood Public Schools. This is one of 5 classroom grants Valley co-funded with the REF this year. The Ridgewood Education Foundation supports programs in the classroom and the community that enhance educational excellence in Ridgewood public Schools.

Shown here, left to right are: Sandy Kunzle, Biophysical Science Teacher, Ridgewood High School; Tom Gorman, Principal, Ridgewood High School; Roberta Sonenfeld, Vice President, Ridgewood Education Foundation; Dave Miaullo, Head, Physics Department Physics Outreach Program, Rutgers University; Megan Fraser, Vice President, Communications and Marketing, The Valley Hospital; Harold Nelson, Physics Teacher, Ridgewood High School; Nancy Reilly, Physics Teacher, Ridgewood High School; and Kyle Narcoonis and Joey Reichert, Assistants, Physics Department Physics Outreach Program, Rutgers University.
